WEST VIRGINIA STATE UNIVERSITY

DEPARTMENT OF HEALTH AND HUMAN PERFORMANCE

B.S. IN HEALTH SCIENCES

PROGRAM OUTCOMES:

After completion of this program, students will be able to:

- Analyze the relationship between social factors and health in addressing health needs of both individuals and the general population.
- Report assessment techniques used in healthcare settings.
- Apply health behavioral theories to health settings.
- Construct health education programming for target populations.
- Recommend health education materials and resources for various health topics.
- Employ basic leadership skills that are vital to leading within healthcare settings.
- Locate health surveillance systems that can be useful in health research and programming.
- Administer quantitative and qualitative statistical methods in health research.
- Inspect health literature to analyze and critique.
