General Education Requirements

The following table provides you with the courses that fulfill the different General Education (GEN ED) requirements for your degree. On your degree map, you will find the following titles throughout different semesters of your college career: Arts, Humanities, International Perspectives, History, Natural Science, Social Science and Wellness. When you see these categories on your map, use the table below to choose a class that will fulfill that requirement. The choice of which class to take under the specific category is completely up to you; however, please note that although some courses fall under two different categories, the credit will NOT be duplicated. For example, if you choose to take BIOL 101 for your Natural Science credit, this will NOT double as your Scientific Reasoning Credit.
