

## **EXPRESSION OF INTEREST**

To Provide Professional  
Architecture/Engineering Services:

**WEST VIRGINIA STATE  
UNIVERSITY**

**HVAC RENOVATIONS FOR  
MULTIPLE FACILITIES**

WSC2400000004  
MARCH 26, 2024

ZMM.COM

March 26, 2024

Mr. Jerry Rush, Director of Purchasing  
West Virginia State University  
5000 Fairlawn Avenue  
Ferrell Hall - Room 301  
Institute, West Virginia 25112

Subject: Expression of Interest to Provide Architectural/Engineering Design and Construction Phase Services for HVAC Renovation Projects at West Virginia State University WSC2400000004

Mr. Rush:

ZMM Architects and Engineers is pleased to submit the attached information to demonstrate our experience and our qualifications to provide professional design and construction phase services for the proposed HVAC Replacements to be completed for Fleming Hall, Ferrell Hall, Wallace Hall, Drain-Jordan Library, and Cole Complex. Established in 1959, ZMM is a Charleston based, full-service A/E firm, and is noted for design excellence and client focus. With over sixty-five local employees ZMM provides an integrated design approach by delivering all building related design services including architecture, engineering, interior design, and construction administration in-house. ZMM investigated each of these building systems when surveying the facilities as part of the 2015 Campus Development Plan. We reviewed the building and systems again in December 2022 to develop a proposal for an updated planning engagement.

ZMM is a longstanding partner of West Virginia State University. In addition to the campus development plan, recent collaborations between ZMM and WVSU include the Katherine Johnson Statue Plaza, the new baseball dugouts (services provided gratis), the conceptual design for the WVSU Downtown Center, and planning for a new research hall. Additionally, one of ZMM's principals (Mr. David Ferguson, AIA, WVSU Class of 1979) is an alumnus.

ZMM's team includes nine registered architects, nine professional engineers, interior and lighting designers, and construction administrators. Our architects and engineers are highly qualified and have worked together to deliver projects with similar scope and complexity. Additionally, ZMM's mechanical engineers are industry leaders that are involved in helping to develop strategies and best practices for HVAC related design issues on both the local and national level. Their experience includes designing mechanical systems in some of West Virginia's most prominent buildings including the State Capitol, the Clay Center for the Arts and Sciences, the Keith Albee Performing Arts Center in Huntington, and the Charleston Coliseum and Convention Center.

ZMM has extensive experience providing design services on higher education facilities. Some examples to our higher education HVAC replacement projects with proximity to West Virginia State University include:

- Marshall University
- West Virginia School of Osteopathic Medicine
- Concord University

ZMM's ability to provide comprehensive design services will be beneficial to West Virginia State University as you undertake the proposed HVAC Replacement projects. Our experience with HVAC replacement projects has provided us with the insight that multiple disciplines may need to be involved in the project, including mechanical and electrical engineers - as well as an architect to ensure that the 'above ceiling' conditions meet the requirements of the current life safety code. Utilizing a full team of design professionals will help ensure the quality of the project and will help eliminate risk for West Virginia State University.

ZMM's engineering team will be led by Bob Doeffinger, PE. Mr. Doeffinger, ZMM's principal responsible for firm and engineering management, brings more than 45 years of mechanical design experience to the project.

The engineering team will also include James Lowry, PE to lead the mechanical (HVAC and Plumbing) engineering effort. Although the project is primarily engineering related, ZMM's process is to assign an architectural project manager to each project to coordinate the engineering disciplines, address any building and life safety code issues, and interface with the client. For this engagement ZMM intends to utilize Chris Campbell, AIA as the project manager.

Thank you for taking the time to review the attached expression of interest that includes responses to the specific information requested in the EOI, as well as ZMM's qualifications, and relevant project experience. Additionally, please visit our website at [zmm.com](http://zmm.com) to see the full range of renovation projects that we have designed. We appreciate your consideration for this important endeavor and look forward to the opportunity to assist West Virginia State University with the HVAC Replacement Projects.

Respectfully submitted,  
**ZMM Architects and Engineers**

Adam R. Krason, AIA, NCARB, LEED-AP  
Principal

FIRM PROFILE

# ABOUT ZMM ARCHITECTS & ENGINEERS

---

ZMM was founded in 1959 in Charleston, West Virginia by Ray Zando, Ken Martin, and Monty Milstead. Since the inception of the firm, ZMM has been dedicated to providing an integrated approach to building design for our clients.

ZMM delivers this integrated approach by providing all building related design services, including architecture, engineering (civil, structural, mechanical, and electrical), interior design, and construction administration with our in-house team. Our integrated design approach makes ZMM unique among architecture/engineering firms, and helps to ensure the quality of our design solutions by providing more thoroughly coordinated construction documents.

ZMM has maintained a diverse portfolio since the founding of the firm. Early commissions included higher education projects for West Virginia University and Concord College, State Office Buildings 5, 6, & 7 on the State of West Virginia Capitol Campus, and armories for the West Virginia Army National Guard.

Maintaining a diverse practice for over 60 years has provided ZMM with extensive experience in a variety of building types, including educational facilities, governmental facilities (military, justice, correctional), healthcare facilities, recreation facilities, commercial office space, light industrial facilities, and multi-unit residential buildings.

The original partners transferred ownership of the firm to Robert Doeffinger, PE and Steve Branner in 1986. Mr. Doeffinger and Mr. Branner helped guide and expand the firm to its present size of 35 people. Over the past 20 years David Ferguson, AIA, and Adam Krason, AIA, LEED-AP joined in ownership of the firm. In 2020, Randy Jones also joined in ownership of the firm when ZMM acquired Blacksburg-based OWPR Architects & Engineers to create a regional design firm that employs more than 60 highly-skilled professionals.

ZMM has become a leader in sustainable / energy-efficient design, and a trusted resource on complex renovation projects. ZMM's unique renovation project approach and ability to

## About ZMM Architects & Engineers (cont.)

provide comprehensive design services has also led the firm to be selected to improve landmark buildings, including the Charleston Coliseum & Convention Center, the Clay Center for the Arts and Sciences, the State of West Virginia Culture Center, and the West Virginia State Capitol Building. Additional significant projects designed by the firm include the Explorer Academy (Cabell County Schools), the Logan-Mingo Readiness Center, the Manassas Park Community Center and Natatorium, the design of the Fourth High School (Frederick County Public Schools), the new Harrington Waddell Elementary School (Lexington City Schools), CAMC Teays Valley ICU, and Ridgeview Elementary School (Raleigh County Schools). ZMM has also provided design services on more than 300 school projects throughout the region.

ZMM's building-related design services include:

### Pre-Design

Educational Facility Planning  
Existing Building Evaluation  
Space Planning  
Master Planning

Programming  
Feasibility Studies  
Site Evaluation and Analysis  
Construction Cost Estimating

### Design

Architectural Design  
Interior Design  
Lighting Design

Sustainable Design  
Landscape Architecture

### Engineering

Civil Engineering  
Mechanical Engineering  
Energy Consumption Analysis

Structural Engineering  
Electrical Engineering  
Net Zero Buildings

### Post-Design

Construction Administration  
Life Cycle Cost Analysis

Value Engineering  
Post-Occupancy Evaluation

As ZMM looks to the future, we remain committed to the ideal of providing high-quality, client-focused design solutions that meet budget and schedule requirements. We listen, we respond promptly with innovative and efficient solutions, and we deliver quality projects and develop lasting relationships. You see us in YOUR community every day.

PROJECT APPROACH

# PROJECT APPROACH

WEST VIRGINIA STATE  
UNIVERSITY

## BACKGROUND

Based upon information provided in the Expression of Interest, ZMM understands that West Virginia State University (WVSU) intends to improve the HVAC systems at multiple facilities on campus. The projects will include the necessary engineering, and other related professional services to design, specify and provide construction contract administration services for HVAC replacements to be completed for Fleming Hall, Ferrell Hall, Wallace Hall, Drain-Jordan Library and the Cole Complex.

ZMM has provided design services on a variety of similar projects, including the expansion of the Charleston Coliseum and Convention Center. The LEED Silver project included the construction of a new central mechanical plant, reconstruction of the large air-handlers for the 13,500-seat arena, as well as renovations, upgrades and new additions to the convention center including spacious glass lobbies, a new 25,000 SF ballroom, and 15,000 SF of new meeting room spaces. The project was completed while the existing facility remained operational.

## PROJECT GOALS/OBJECTIVES

The following goals and objectives have been identified by West Virginia University:

1. Review existing plans and conditions as well as the operation of the facility and evaluate while communicating effectively with the owner to determine a plan that can be implemented in a manner that will minimize disruption to concurrent operation of the facility and meet all objectives.
2. As a portion of the process outlined in Objective 1, provide all necessary services to design the facilities described in this EOI in a manner that is consistent with the University's needs, objectives, current law, and current code; while following the plan to design and execute the project within the project budget.
3. Provide Construction Contract Administration Services with competent professionals that ensure the project is constructed and functions as designed.

# PROJECT APPROACH (CONT.)

## PROJECT APPROACH AND METHODOLOGY

ZMM Architects and Engineers recommends the following approach to complete the HVAC Renovations projects:

- Commence the project with an on-site meeting with WVSU. Key items to be discussed during the meeting include:
  - Review Issues with the Current HVAC Systems
  - Review the Proposed Scope of Work
  - Review the Project Budget and Schedule
  - Review Project Constraints (Facility to remain Operational Throughout Construction)
  - Discuss Energy Efficiency Objectives

Following the on-site meeting, ZMM would commence the investigative phase of the project. The investigative work and research for the project will ensure a cost-effective, well-designed solution that will help eliminate changes or other issues during the construction phase. ZMM will also discuss potential HVAC system options with key stakeholders. Our evaluation will include:

- Conduct an In-Depth Study of Any Existing Drawings and Site Conditions Relative to the HVAC Systems
- Review all HVAC Components for Integrity
- Conduct Destructive Testing where Required
- Consider HVAC System Performance/Insulation Requirements
- Discuss Various HVAC Systems Including Initial Cost and Life Cycle Cost
- Work with WVSU to Develop Recommendations for the HVAC Systems

The results of the discussion, investigation, and analysis will be the preliminary engineering report. The report, which will be in letter format, will confirm the project scope, budget, scheduling, and phasing requirements. This report will serve as the basis for the construction drawings and bid specifications.

Once the preliminary engineering report is complete, ZMM will commence the design effort. Drawings, specifications, and estimates will be submitted for review at the end of each design phase (schematic, design development, and construction documents). Our previous relevant experience working on similar projects for WVSU will help ensure that all documents meet your requirements and standards – saving WVSU from expending additional effort and expediting the design phase of the project. The ZMM team will also submit the drawings and specifications to all required regulatory agencies including the State Fire Marshal's Office for approval prior to the project going out to bid.

Once the documents have been approved, the ZMM team will assist with the bidding and construction phases of the project, including participation in a pre-bid meeting, developing any required addenda, responding to RFI's, reviewing submittals, and conducting and preparing minutes of construction progress meetings. Our efforts will continue through substantial and final completion inspections and include an eleven-month warranty walk through. Our goal throughout this process will be to act as part of your team, with the objective of ensuring the seamless delivery of the projects for WVSU.

## PROJECT APPROACH (CONT.)

### COMMUNICATION

During the design phase Adam Krason, AIA and Chris Campbell, AIA will serve as the primary contacts for the design team and will coordinate the work of our engineering team. These key team members as well as all primary WVSU contacts would be included on all communication to facilitate an open discussion throughout the projects – in a manner that allows WVSU to remain actively involved in all design decisions. All correspondence will be copied to this core group. As the project progresses regular bi-weekly meetings will be held to review the design progress, outstanding issues, as well as any regulatory or budget concerns. Meeting minutes will be produced to document discussion items, decisions, and responsibility for follow-up. Our team's recent experience working with WVSU will help facilitate this open communication. During the construction phase additional resources will be added to ensure prompt and efficient responses to any issue that may arise. The project architect, Chris Campbell, AIA will coordinate the effort of the design team, and will be assisted by Keith Gonzales. Additionally, all submittals, pay applications, and RFI's will be logged and tracked by Amy Rhodes. Ms. Rhodes will update the entire project team (WVU, ZMM, and Contractor) weekly regarding outstanding items. ZMM currently utilizes ShareFile to provide real time access to all project information during the construction phase.

ZMM's recent experience collaborating with West Virginia State University on the Campus Development Plan, Katherine Johnson Statue Plaza, and Downtown Center demonstrates our ability to meet your needs. Our team is comprised of some of the leading professionals in West Virginia and is experienced in each discipline required to implement your project. With over sixty-five (65) employees, ZMM provides an integrated design approach by delivering all building-related design services including architecture, engineering (civil, structural, mechanical, and electrical), interior design, and construction administration in-house. Our architects and engineers are highly qualified and have worked together to deliver projects with similar scope and complexity.

### MECHANICAL/ELECTRICAL TEAM

ZMM Architects and Engineers is a fully integrated firm that offers mechanical, electrical, and plumbing engineering with their in-house professionals. Our MEP engineers are industry leaders that are involved in helping to develop strategies and best practices for HVAC related design issues on both the local and national level. Higher education HVAC experience:

- Marshall University - Smith Hall Study
- Marshall University - Smith Music Hall Renovations
- Marshall University - Sorrell Maintenance Center HVAC Improvements
- BridgeValley CTC
- WV School of Osteopathic Medicine

ZMM's engineering team will be led by Bob Doeffinger, PE. Mr. Doeffinger, ZMM's principal responsible for firm and engineering management, brings more than 45 years of mechanical design experience to the project. The engineering team will also include James Lowry, PE to lead the mechanical engineering effort, and Frankie Kantsios, PE to assist with any required electrical engineering.

## PROJECT APPROACH (CONT.)

### UNDERSTANDING LOCAL CONSTRUCTION MARKET

ZMM Architects and Engineers has been providing design services in West Virginia for 65 years. As an integrated architecture and engineering firm, ZMM regularly provides design and construction phase services on projects (located in West Virginia) exceeding \$100M yearly - with a significant number of projects located in the Charleston area. The depth of our local experience has provided us with the opportunity to work with nearly every general contractor and major sub-contractor in the region. This experience has led ZMM to become a trusted resource in the local design and construction industry.

### PROXIMITY TO WEST VIRGINIA STATE UNIVERSITY

ZMM's entire team of architects and engineers is located less than 20 miles from the project.

3.

RELEVANT EXPERIENCE

# HVAC RENOVATION EXPERIENCE

**Charleston Coliseum & Convention Center (2015)** – Replace entire MEP infrastructure three 1,000 ton chillers and cooling towers, three 8,000 mbh gas condensing boilers, approximately ten VAV AHU's, approximately 10 large single zone VAV AHU's.

**Charleston Kanawha Health Department (2015)** – Replace entire mechanical system to include air cooled chiller, gas fired make-up unit and zone fan coils with electric reheat, approximately 45,000 SF new DDC controls.

**United Bank Building – Cooling Tower Replacement (2010)** – Two 400 ton centrifugal chillers, rebuild two large VAV AHU's, installed free cooling plate frame heat exchangers (2015).

**Kanawha County Public Library (2015)** – Replaced two gas-fired boilers with new gas condensing boilers .

**Building 5 Capital Complex (2008)** – Replaced 10<sup>th</sup> floor office space air condition, replaced perimeter induction units with new steam chilled water air handling units, distributed VAV terminal units with modification to architectural fit out approximately 22,000 Sf. Installed new sprinkler service entrance for Buildings 5, 6, and 7.

**Capitol Complex Building 5, 7<sup>th</sup>, 8<sup>th</sup>, & 9<sup>th</sup> Floors** – Rebuild perimeter induction system and interior multi-zone distribution in addition to total architectural fit up, approximately 70,000 SF.

**Capitol Complex Building 6, 3<sup>rd</sup>, 4<sup>th</sup>, & 5<sup>th</sup> Floors** - Rebuild perimeter induction system and interior multi-zone distribution in addition to total architectural fit up, approximately 70,000 SF.

**WV Lottery Headquarters Building (2014 - 2015)** – Installed 40,000 SF of new variable refrigerant system, new make-up air system, comprehensive architectural services.

**WV State Capitol Cafeteria** – Installation of large catering and service kitchen, included steam make-up air system, 3 Class 1 kitchen hoods, Class 2 kitchen hoods, all plumbing system, sprinkler system including sprinkler service entrance for entire Capitol Buildings, comprehensive architectural services.

**Old Kanawha Valley Bank Building (2003)** - New Cooling Chiller  
(2015) - New Cooling Tower

**City Center East (2008)** Chiller Replacement.

**Tenant Fit-Up Numerous Office Buildings Charleston** – BB&T Building, City Center East, United National Bank Building, Hunting National Bank Building to include VAV distribution, electrical and architectural services.

# HIGHER EDUCATION CAMPUS DEVELOPMENT PLANS

LOCATION  
WEST VIRGINIA

COMPLETION  
2012 - PRESENT

ZMM Architects & Engineers has created Campus Development Plans (often referred to as Master Plans) for a variety of institutions throughout West Virginia.

These plans have been developed for:

- West Virginia State University (in association with TERRADON)
- New River Community and Technical College
- Southern West Virginia Community and Technical College
- BridgeValley Community and Technical College

Details of these plans are as follows:

## West Virginia State University

ZMM Architects & Engineers, in conjunction with BSP and TERRADON, were selected to develop a 10-year Campus Development Plan for West Virginia State University's campus in Institute, WV. The project commenced with a review of all existing information available about the campus and targeted facilities. Following the stakeholder meetings, ZMM conducted building assessments of the major academic buildings, as well as the kitchen adjacent to the main dining area. This information was supplemented by a recent campus building inventory that had been conducted. The information gathered through this variety of activities was

## Higher Education Campus Development Plans (cont.)

then synthesized into an overall campus development plan. The plan, which covers a 10-year period, projects the need for new construction, property acquisition, site improvement and building renovation, and includes a phased approach for the implementation of campus improvements. The document is supplemented with a visual master plan that reflects the implemented improvements.

### New River Community and Technical College

ZMM Architects & Engineers worked with New River Community and Technical College to develop a Master Plan that improved the efficiency of space usage across the school's four campuses:

- Raleigh County (including Ghent ATC)
- Lewisburg
- Princeton
- Summersville

When the plan was completed, New River Community and Technical College had elected to reduce their overall footprint from 14 to 7 facilities. This improved the efficiency of space usage from 262 SF/FTE to 190 SF/FTE. ZMM visited the remaining facilities to develop a plan to address deferred maintenance issues. The plan also anticipated a modest addition to the facility in Summersville to accommodate several programs that are currently housed off-site.

### Southern West Virginia Community and Technical College

ZMM Architects & Engineers commenced the Southern WVCTC master planning process by having a team of architects and engineers visit all of the campuses and sites:

- Logan Campus
- Williamson Campus
- Boone Campus/Lincoln Site
- Wyoming/McDowell Campus

Following these campus visits, ZMM conducted stakeholder meetings at each location. At the meetings stakeholders discussed positive attributes, challenges, and needs for each facility and campus. Following the stakeholder meetings, an Executive Steering Committee was convened to review the outcomes of the stakeholder meetings, and to assist

## Higher Education Campus Development Plans (cont.)

in developing an overall strategy and framework for the plan. Based upon these meetings, several themes emerged that helped guide the development of the Master Plan. It was determined that the plan would include standards for signage, lighting, and exterior finishes. Additionally, although a significant expansion of facilities is not envisioned, the Master Plan will include the potential development of a new facility on property that has already been acquired adjacent to US 119. This new facility will replace the Boone County Campus, which is currently located in a shared facility with the Boone County Career and Technical Center. The new facility would serve as a gateway to Southern's other facilities, and the location on US 119 will give the College the opportunity to draw additional students from the greater Charleston area. Due to the scope of the development of this new facility, the Master Plan includes a strategy to address improvements both with and without the new Boone County Campus. Other potential improvements included updating Southern's two largest facilities - Building 'A' on the Logan Campus, and the Main Building on the Williamson Campus, as well as the development of *Student Success Centers* on all campuses (starting in Logan).

### BridgeValley Community and Technical College

ZMM Architects & Engineers has produced several Campus Development Plans for BridgeValley CTC (previously Bridgemont CTC and Kanawha Valley CTC). The master plan includes assessments of existing facility conditions on the Montgomery and South Charleston Campuses, including deferred maintenance, building code issues, and energy efficiency. An analysis was included that identifies current and future space needs, parking requirements, current land use and future property acquisition, infrastructure development, sustainability, landscaping, and pedestrian circulation. The plan also includes project budgeting and a multi-year capital improvement plan. An assessment of the impact of projected enrollment and demographic changes on facilities was provided along with a delineation of how the campuses will interact and support each other and improve efficiency. Recent updates have included additional investigation of existing facilities on the Montgomery Campus and in the historic Elk City neighborhood on Charleston's West Side, as well as the Stone & Thomas Building in downtown Charleston.

# KATHERINE JOHNSON STATUE PLAZA WEST VIRGINIA STATE UNIVERSITY

LOCATION  
INSTITUTE, WV

COMPLETION  
2019

ZMM Architects and Engineers assisted West Virginia State University (WVSU) with the design of a statue plaza to honor distinguished NASA mathematician and WVSU alumna Katherine Johnson.

"A native of White Sulphur Springs, W.Va., Katherine graduated from West Virginia State in 1937 at the age of 18, with bachelor's degrees in mathematics and French. Her pioneering work as a "computer" at NASA has been widely recognized following publication of the book, *Hidden Figures*, by Margot Lee Shetterly, and by the movie of the same name. In 2015, she received the Presidential Medal of Freedom, the highest award that can be bestowed upon a civilian." ZMM assisted with the project by developing the design of the plaza that houses the statue. An existing parking lot located adjacent to the Cole Complex was removed to make room for the plaza. The selected location for the plaza helped advance the 10 year Campus Development Plan (also designed by ZMM), which recommended moving all vehicular traffic away from the green Quad, and towards the perimeter of the campus.

The plaza utilized existing pedestrian circulation (sidewalks) to enhance the connection to the Quad, and added a transverse sidewalk to develop an intersection that became the location of the statue. The new sidewalks slope up slightly to give the statue prominence. The life-sized bronze statue, designed by WVSU alumnus and West Virginia sculptor Frederick Hightower, is located on a small raised platform that is large enough for students to interact with and pose for photographs. WVSU president Dr. Anthony Jenkins noted that he hopes "that my daughters and all of my

## Katherine Johnson Statue Plaza (cont.)

students at West Virginia State University see this monument as an example of what they can accomplish when they dedicate themselves, work towards a greater cause and remain cognizant of their own strength and always seek to do better, be better and want better." In addition to the site layout, ZMM was also responsible for the design of the signage, lighting, and other site amenities.

# WV SCHOOL OF OSTEOPATHIC MEDICINE

LOCATION  
LEWISBURG, WV

SIZE  
VARIOUS

COMPLETION  
ONGOING

The Main Building for the West Virginia School of Osteopathic Medicine was originally built in the 1920's with numerous additions and alternations over the years.

The Main Building was built with 5 major pods and enclosed corridors connecting the pods into one large multistoried building that includes offices, classrooms, library, and meeting rooms. The building's brick and stone exterior is old, some more that 90 years old, and exhibits deterioration from the effects of exposure to the exterior elements.

The brick and stone exterior shows deterioration of the mortar joints and various cracks from expansion and contraction from temperature change and freezing. The steel lintels above doors and windows exhibit rusting, some have rusted enough to cause structural damage to brick or concrete header. Concrete, cement plaster elements along with metal flashing also show some deterioration and are in need of repair. ZMM produced construction documents to clean and repair all deteriorated portions of the building's exterior. These documents show all the building's exterior condition and include details, specific repair instructions and quantities of repair work for the entire building.

In 2021 the Main Building received a roof replacement.

## WV School of Osteopathic Medicine (cont.)

### Robert C. Byrd Clinic: Interior Renovation

The interior renovation to the Robert C. Byrd Clinic, a non-profit organization affiliated with WVSOM. The project includes renovation of 1,075 SF of existing administrative area which included two offices and a large open office area. ZMM renovated this area to provide three offices and paired exam rooms along with a reception area and waiting room for psychiatric / behavioral health services. Reworking of the existing building systems; HVAC, electrical, lighting and fire suppression systems were also included in the scope of work. The Robert C. Byrd Clinic also had a roof replacement.

### Main Building and Robert C. Byrd Clinic: Waterless Fire Suppression

Another project ZMM completed was the addition of a waterless fire suppression system for the server rooms in the Main Building and the Center for Technology and Rural Medicine. The renovation included sealing the interior perimeter of each server room and the installation of a fire suppression system that protected inside the room, above the acoustical ceiling and below the raised computer floor. The new system connected to the existing fire alarm control panel, has disconnects that shut down air conditioning units, and are connected to a roof mounted exhaust fan for purging the room after discharge.

### Tech Center Expansion - Testing Center

The Testing Center is designed to accommodate 220 students and will connect the Center for Technology and Rural Medicine (Tech Center) and the Clinical Evaluation Center (CEC). The main Testing Center space is being designed to support student achievement by limiting visual and auditory distractions. The interior environment is also designed to create a calming or contemplative space for WVSOM students. The Testing Center has two entry vestibules on either side of a registration desk, which is separated from the proctor area by a technology room. The project includes reconfiguring office space in the Tech Center for Pre-Clinical Education and Information Technology, while the addition provides expansion office space for Information Technology and new offices for the Exam Center.

### Additional Projects:

- Facilities Master Plan
- Green Space at Campus Entry
- Alumni Center - HVAC and Roof Replacement
- Stookey Library - Roof Replacement
- Tech Center - Natural Gas Generator

# MARSHALL UNIVERSITY MULTIPLE PROJECTS

LOCATION  
HUNTINGTON, WV

SIZE  
VARIOUS

COMPLETION  
ONGOING

ZMM has significant experience providing Architectural and Engineering services to Marshall University.

## Smith Hall Renovation

This 22,000 SF renovation project was completed in 2017 and included interior finish and acoustical upgrades to improve the quality of the music practice rooms and additional performance areas. ZMM worked closely with Marshall University professors to determine the correct acoustics to meet the accreditation needs for the college. Taking inspiration from The Thundering Herd, the building was transformed with a mature palette and pops of green. Interior improvements included replacement of ceilings in areas that were affected by the HVAC replacement. Existing ceilings in the practice rooms received a sound blanket barrier and acoustical coating to improve the performance of the space. Paint, carpet and acoustical wall treatments were also installed.

Mechanical system improvements were implemented to correct issues of the aging HVAC system, which was a high-energy user. ZMM converted the system to VAV by installing terminal units with SCR electric reheat. A smaller electric coil provided enough electrical capacity to power the terminal reheat. ZMM retained the fan wall and chilled water coil and installed DDC controls. Dehumidification was provided by a gas-fired humidifier to maintain stable humidity. Additional projects at Smith Hall include:

- Building Assessment
- Cooling Tower Replacement
- Underground Chilled Water Piping

## Marshall University (cont.)

- Retrofit AC Smith Hall Music Building - Dual Duct VAV Humidified Building

### Drinko Library

- Mechanical and Electrical Assessment in 2022
- Cooling Tower

### Morrow Library

- Underground Chilled Water Piping

### IT/OT Security OP Center

- Development of the New Cyber Security Command Center

### Sorrell Maintenance Building

- Air Conditioner Replacement

### Applied Engineering Building

- Chiller Consulting

### Pritchard Hall

- Chiller Replacement

# WOODY WILLIAMS CENTER FOR ADVANCED LEARNING AND CAREERS

LOCATION	SIZE	COMPLETION	COST
BARBOURSVILLE, WV	230,000 SF	TBD	\$40M EST.

The new Cabell County Career and Technology Center is one of six projects funded through a bond passed by Cabell County voters in 2020.

This project was renamed the Woody Williams Center for Advanced Learning and Careers and converts the existing abandoned 230,000 sf SEARS Store at the Huntington Mall. This innovative educational center will help prepare students for the workplace through a variety of pathways in career and technical fields.

The facility will be host to more traditional programs such as Auto Mechanics, Collision Repair, Welding, Machine Tool Technology, HVAC, Electrical, Carpentry, Building Facility Maintenance, Masonry, Plumbing, Culinary Arts, and Cosmetology. In addition to the traditional programs' students will have the opportunity to explore other options such as Vocational Agriculture, Graphic Design, Law and Public Safety, Medical Assisting, LPN, Coding, and Aerospace Engineering. Students will also have the option to take associated classes at their home high school or have the option to remain at the Career Center the entire day and take all their classes at that location.

The facility will also have a Multipurpose Room so students can meet all their PE credits, Meeting Rooms for events and county wide meetings, and a full Kitchen and Dining area for students as well as a rooftop dining space. Collaborative spaces for students to gather are scattered throughout the facility. Graduates can also attend as a year fourteen student and participate in several selected programs. The facility will also be open after school hours for hobby classes and adult programs.

## Woody Williams Center (cont.)

The existing painted masonry façade will be clad in multicolored metal panels and horizontal windows. The existing main entrances will be removed and reimagined with a two-story glass façade that stretches into the existing building and terminates into a lecture stair adjacent to a live green wall. The two-story entrance corridor will be the focal point of the interior space, highlighting the classrooms that overlook the entrance corridor. All classrooms and lab areas will have a glass entrance to showcase the technology and career learning that goes on inside the space.

This is a groundbreaking project for Cabell County Schools and education design in West Virginia that reimagines an abandoned retail store into a career academy showcasing technology and career education for high school students and adult education.

# ERMA BYRD CENTER

LOCATION BEAVER, WV	SIZE 33,000 SF	COMPLETION 2007	COST \$7.5M	AWARDS 2008 AIA WV HONOR AWARD & AS&U OUTSTANDING BUILDING DESIGN
------------------------	-------------------	--------------------	----------------	--

## The Erma Byrd Center for Public Higher Education is the first building of its kind in the state.

The 33,000 SF center provides students the convenience of taking a variety of college classes offered by six different colleges and universities in a single location.

The facility consists of standard classrooms, distance learning classrooms, science lab, computer classroom, lecture hall, and a multimedia library, along with administrative office space for each college and university. Through technology, the building itself becomes an educational tool. Students are able to monitor the HVAC system and its controls through web-based software, thereby learning how the system works and how the climate and building design affect performance.

A wind turbine and solar panels on-site assist in reducing the overall utility cost and allow students to see first-hand the benefits of alternative energy sources. This higher education facility sets a new standard for the learning environment and energy efficiency. The building is designed to maximize use of natural light and has sensors throughout that control the artificial light level by measuring the amount of light present in the space. The high-tech facility is the first building on what has become a campus for public higher education. Its placement at the front of the site allows the building to serve as a beacon of what is to come.

# 4.

## TEAM QUALIFICATIONS

# ADAM KRASON

AIA, LEED AP, ALEP

Principal

Mr. Krason has served in the capacity of Architect and Project Manager for a variety of projects at ZMM. This experience includes Military, Educational (K-12 and Higher Education), Office, Justice (Courthouses, Correctional, Justice Centers), and Multi-Unit Residential projects. Mr. Krason's responsibilities include programming, design, documentation, coordination of the architectural and engineering team, as well as construction administration. Mr. Krason began his career in 1998, working on a variety of educational, commercial office, and correctional projects throughout Ohio, West Virginia, and North Carolina.

Mr. Krason has been an advocate of sustainable design and energy efficiency and has participated and presented at sustainable design seminars throughout the region. Mr. Krason also serves on the Board of Directors and is responsible for firm management, business development, and corporate philanthropy at ZMM. In addition to his role at ZMM, Mr. Krason is actively engaged in his community, serving on a variety of statewide and local civic and non-profit boards.

# RODNEY PAULEY

AIA

Project Architect

Mr. Pauley oversees the daily design and production of the building, working in conjunction with in-house architectural and engineering staff to ensure the building not only meets the program requirements and budget, but meet the long-term needs of the owner. He also works directly with project principals to manage contracts, staffing and project deliverables. Mr. Pauley has a broad knowledge of building materials and services, building codes, construction techniques, and architectural detailing.

Mr. Pauley began his career in 1992 with a firm in Atlanta, Georgia, and for the next 12 years rose to the Associate level by designing and managing a wide variety of project types including educational, retail, historic renovation, medical, and entertainment, specializing in office and speculative office design. In 2010, Mr. Pauley moved back to Charleston, WV, as Project Manager for ZMM supervising design and production.

# Robert Doeffinger

PE

Principal

As ZMM's Principal Engineer, Mr. Doeffinger is in charge of the engineering disciplines, it is his responsibility to ensure that the mechanical and electrical engineering components of ZMM's design are coordinated and integrated into the final product.

After graduate school in Architectural Engineering, Mr. Doeffinger joined ZMM. He has over 45 years design experience in mechanical and electrical systems for buildings. He has a broad range of engineering experience in education, industrial and manufacturing facilities, large retail, correctional and jails, office buildings, and military facilities.

Mr. Doeffinger is responsible for new design and retrofit of chilled water systems for all building types including large regional shopping malls. He is involved daily with the firm's selection of appropriate systems for all building types and performs life-cycle cost analysis and energy studies.

Mr. Doeffinger is a member of the American Society of Heating, Ventilation and Air-Conditioning Engineers. He is the current national Chairman of the Technical Committee on Heating and Air-Conditioning Load Calculation. He is involved in writing the National Standard on the Method of Calculation, which will shape the nature of the future building energy use for the nation.

# JOHN PRUETT

PE, LEED AP

Sr. Mechanical Engineer

Mr. Pruett is responsible for overseeing the design of the HVAC systems, ensuring that the HVAC systems not only meet the program requirements, but meet the long-term needs of the owner. He performs heating and cooling load calculations and recommends the type of systems to be incorporated into the building. He coordinates with the other disciplines in order to integrate the HVAC systems into the building. Mr. Pruett has participated on several LEED registered projects; one of his key contributions to these projects is conducting energy analyses and recommending energy use reduction alternatives.

Mr. Pruett began his career in engineering with a manufacturing company in 1994. In 1998, he made a career change and joined an engineering consulting firm as an HVAC design engineer. He has a broad range of experience in HVAC systems design, including K-12 schools, higher education facilities, office buildings, libraries, hotels, restaurants, a convention center and several natatoriums. Having served in the Marines for 14 years, Mr. Pruett also led a design team for a "virtual memorial" for the birthplace of the U.S. Marine Corps.

# FRANKIE KANTSIOS

PE

*Electrical Engineer*

## EDUCATION

Bachelor of Science  
Old Dominion University, 2019

Associate of Applied Science  
New River Community College, 2016

## LICENSURE

West Virginia, Virginia, Ohio

As an electrical engineer, Mr. Kantsios is consistently motivated to adapt to the team's needs in assessing and finalizing the project on time. He is an experienced professional with a proven record of managing projects from concept to completion while staying versatile to the specific project at hand. By carrying out engineering and design services for a diverse field of projects since 2013, Mr. Kantsios has expanded his knowledge and understanding of the industry; providing him with the means to meet the clients' needs for each individual program. He has been actively involved in the design of a wide array of new structures and renovations to include K-12 educational buildings, higher education buildings, healthcare facilities, office buildings, banks, restaurants, hotels, automotive dealerships and service centers, apartment complexes and dorms, industrial facilities and warehouses, and athletic facilities. Whether working independently or in conjunction with other architects, engineers, and contractors, Mr. Kantsios excels at creating effective solutions and developing opportunities that further establish organizational goals.

*\*Previous Employer Experience*

# TODD POFF, PE

PE

Structural Engineer

Mr. Poff started as a Civil Engineer. After working in that department for several years, he began moving over to the Structural Engineering Department; where his true interest, and most of his training lies.

As a Structural Engineer, it is Mr. Poff's responsibility to insure the safety of the structure's design, as well as any occupants inside those structures. As a member of the design team, Mr. Poff understands that the structural system of a building needs to have the least amount of impact possible on the architectural design and on the way clients use the buildings. It is that kind of teamwork, with all major design disciplines in-house, that allows ZMM to say with confidence we provide our clients with a building design that will not only meet their needs but will be a place they can enjoy for many years to come.

## EDUCATION

Bachelor of Science

May 4, 2022

I am writing this letter to acknowledge the excellent work provided by Adam Krason and ZMM Architects in designing and presenting the BridgeValley Campus Development Plan. After assessing the building inventory and square footage available on our campuses, they formulated and recommended a student to square foot ratio appropriate for the school's programs, enrollment, and resources. The Plan maximizes student opportunities for success and matches the college's long-term goals while maximizing efficiency.

While working with ZMM, we found their representatives took time and listened to the needs of all BridgeValley constituents. From the start of the project to completion, our experience working with ZMM has been nothing but positive. BridgeValley strongly feels that the quality of work, the timeliness of submissions, and attention to detail were exceptional and made ZMM a great group to work with. We look forward to the possibility of working with ZMM again in the future.

Sincerely,

*casey sacks*

Casey K. Sacks, Ph.D.  
President  
BridgeValley Community and Technical College

CERTIFICATION AND SIGNATURE: By signing below, or submitting documentation through e-mail, I certify that: I have reviewed this solicitation in its entirety; that I understand the requirements, terms and conditions, and other information contained herein; that this bid, offer or proposal constitutes an offer to the Commission/Institution that cannot be unilaterally withdrawn; that the product or service proposed meets the mandatory requirements contained in the solicitation for that product or service, unless otherwise stated herein; that the vendor accepts the terms and conditions contained in the solicitation, unless otherwise stated herein; that I am submitting this bid, offer or proposal for review and consideration; that I am authorized by the vendor to execute and submit this bid, offer, or proposal, or any documents related thereto on vendor's behalf; that I am authorized to bind the vendor in a contractual relationship; and that to the best of my knowledge, the vendor has properly registered with any State agency that may require registration.

By signing below, I further certify that I understand the Commission/Institution is requiring the vendor to follow the provisions of WV State Code 5A-3-62 which automatically voids certain contract clauses that violate State law.
