

Measure 2 (Initial) Satisfaction of employers and stakeholder involvement. (R4.2|R5.3|RA4.1) Data provided should be collected on employers' satisfaction with program completers.

As a component of the SkyFactor survey process, the six completers of the survey were asked to provide contact information for their school administrator which then triggered the release of a survey to each noted administrator. Only four completers provided the contact information. One of the four administrators who received the survey then contacted the EPP to state that they had contacted their LEA's attorney and were told that participating in the survey would be a violation of confidentiality. The administrator in question opted out of the survey. The three remaining administrators did submit the survey which yielded a 75% return rate. However, it should be noted that the number of actual participants was also too low to generate substantive data (with n=3). The resulting information was shared with faculty during our data debrief in Fall 2022.

The link below contains data related to the SkyFactor Survey data for employers:
